PROFILE

Computer Science student with strong results in quantitative coursework, including Calculus, Linear Algebra, Discrete Math, and Data Structures. Tutored peer students privately and through university volunteer programs while enrolled in those same courses. Self-taught programmer from age 12, selected at age 18 for Replit Ventures, a competitive global startup incubator program, for building a software startup.

EDUCATION & UNIVERSITY ACCOMPLISHMENTS

Reichman University | B.Sc. in Computer Science | **2024 - 2027/2028** | Israel, Herzliya
- **Current GPA:** 92/100, Data Structures: 90, **Calculus 1:** 100, Calculus 2: 91
- Linear Algebra 1: 89, Linear Algebra 2: 92, Discrete Math: 91, **Intro to CS (Java):** 100

Private University Tutor – Tutored in Calculus 1 while enrolled in the course, conducting 4–6 weekly one-on-one sessions

“Big Brother” Mentorship Volunteer Program – Selective program aimed at providing IDF lone-soldiers with guidance and mentorship throughout their army service

“Chicks & Roosters” University Volunteer Program – Selected in first year of studies to mentor and support computer science students in courses such as Linear Algebra and Intro to CS, a role typically restricted to second- and third-year students

“Buddy” University Volunteer Program – Selected to assist IDF reservist students during the Iron Swords War, providing one-on-one peer tutoring in Calculus 1, Linear Algebra 1, Discrete Math, and coding in Python/Java

EXPERIENCE

Sarona Ventures – Internship | Investor Relations & Business Analysis

- Automated internal workflows using Google Apps Script and Python
- Built scripts to consolidate multiple Google Sheets edited asynchronously into a single up-to-date dataset
- Developed Python scripts for lead generation during an emergency initiative supporting Israeli tech companies, prospecting 2000+ potential limited partners and exceeding the target of 50 per week

2024 (4 months) • Israel

Israeli Defense Forces Combat Soldier | Tzanhanim

- Drafted as a lone soldier after immigrating from London (oleh chadash), operating in unfamiliar environments while independently adapting to a new language, culture, and responsibilities under pressure
- Operated in high-pressure operational environments requiring coordinated team execution, communication, and trust

2022 - 2024 • Israel

Replit Ventures (RV0) | Startup Founder (Selected 1/6 from 400+ applicants)

- Selected for a competitive global incubator, completing a 10-week program focused on launching production-ready software
- Built backend systems in Python handling server-side logic and message processing workflows
- Collaborated with experienced engineers and founders to iterate on product design, scalability, and deployment

2021 (Age 18) • London

PROJECTS / EXTRA-CURRICULAR ACTIVITIES

Online Chess Platform | Real-Time Multiplayer Web Application

- Built a Python-based server handling concurrent client interactions and real-time state synchronization
- Implemented client-server communication to maintain consistent game state across distributed clients

2021 (Age 18) • London

Little Man Computer Simulator | Computer Architecture Model & Execution Environment

- Designed and implemented a full software simulation of a simple CPU architecture
- Built a custom assembly editor with syntax highlighting to support low-level program development and testing
- Implemented the fetch-decode-execute cycle and instruction handling logic within a structured JavaScript codebase

2020 (Age 16-17) • London
